EIP

EIP's new Sweden office
expands with a further
partner hire

EIP, the patent law firm specialising in high-value and complex matters, is today announcing the hire of Pontus Falk as a partner at its recently opened Sweden office.

EIP announced the opening of its Sweden office, its first in the Nordic region, in September with a four-partner team specialising in life sciences, chemistry and digital sectors. Pontus joins from AWA, where he previously worked alongside several of the EIP Sweden team including Daniel Enetoft whom he met when they completed their training together.

Pontus is a European patent attorney with over 10 years' experience of working with a range of clients from start-ups to large international enterprises, with a focus on drafting, prosecution and IP strategy. His technical expertise covers a range of applied physics, semiconductor processing, X-ray generation, battery manufacturing, eye tracking, and medical implant technology.

Magnus Hallin, CEO of EIP, comments on the latest hire:

"I am delighted to see EIP's Sweden office continue to make its mark in the region with the recruitment of Pontus. Having previously worked with Pontus I am confident that he will be a fantastic addition to EIP."

Inga-Lill Andersson, Head of the Stockholm office and EIP's practice in Sweden, says:

"It is great to see our Sweden team expanding so quickly. Pontus's expertise complements the skills of the team in Sweden and across EIP's offices. I am excited for Pontus to join our team and look forward to working with him again."
